Department of Computer Science and Engineering

Research Experience for Undergraduates Summer Program in Computer Science and Engineering May 28 to August 4, 2007

The Department of Computer Science and Engineering at the University of South Florida in Tampa, FL announces research summer opportunities for qualified junior and senior undergraduate students in Computer Science and Engineering or closely related fields. The program is funded by the National Science Foundation's Research Experience for Undergraduates (REU) program. Students selected to participate in the program will work with faculty, share their experiences with fellow participants, attend seminars, acquire oral and written presentation skills, and learn how to conduct independent research.

The program provides exciting research opportunities in the areas of Computer Networks, Artificial Intelligence, Robotics, Real-Time Software Verification, Computer Architecture, Distributed Systems, Security, Transportation, VLSI design, and Image Processing, among others.

Students spend 10-weeks with a faculty member doing research in one project of interest while attending seminars and presentations from faculty and industry representatives about research and career development. Students will be awarded a stipend of approximately \$3200 plus additional financial support for meals.

The deadline to apply is March 15, 2007 and awardees will be notified no later than March 30, 2007. US Citizenship or permanent residency is required. Women and minorities are encouraged to apply. The application form, instructions and all information about the program can be found at <http://www.cse.usf.edu/REU>.
