The white board in PHY 118 still does not erase cleanly. I am even using a white board cleaner and this too is to no avail. Here is a view of the board from the 17th of this month at the end of class:

and, from today (May 24, 2011) at the end of class:

Please fix! This is my second work request. My students are having trouble seeing what I write on the board.

Thanks!
