Third Swedish National Computer Networking Workshop SNCNW 2005

The purpose with the Swedish National Computer Networking Workshops is to create a forum where researchers and practitioners in computer networking in Sweden can meet and exchange ideas. The main objective is to establish better contact between computer network researchers, practitioners and industry, and thus to help strengthen this field in Sweden. Submitted papers that fall within the scope and format of the conference are all going through a review process. For the accepted papers this process main objective is to provide feedback to the authors.

SNCNW 2005 is the third workshop in the series. The workshop will take place at Halmstad University, November 23-24, 2005. The program contains a keynote address and 24 technical contributions divided into eight oral presentation sessions and one poster session.

The workshop starts at 10.00 (coffee and registration, 9.00-10.00) on the 23rd and ends at 15.30 on the 24th.

LOGOTYPE CONTEST!

You are welcome to design proposals of a logotype for SNCNW. The winning proposal will be awarded a price during the second conference day. We prefer electronic submissions send to joohan@telecom.lth.se but it is also possible to hand in proposals to Johan Karlsson during the conference. Proposals shall be submitted at the latest during the morning coffee break, November 24.
