FSM UPnP invisible proxy
Proxy in promiscuous mode

*SSDP message can be alive, byebye, or discovery answer.
**P21 is because the proxy took over too early or the service wakes up by itself.
*** TCP message can be of several types.
• Eventing: SUBSCRIBE (new subscription or renewal), UNSUBSCRIBE.
• HTTP GET to get XML scheme or presentation HTML
• SOAPAction request
Proxy wakes up service when receiving any of these messages.
